

Child Support Multipliers

If there is more than one child, multiply CS (the amount of child support) by one of the following factors [see FC §4055(b)(4)], or simply use the certified child support programs, which build in this calculation:

2 children	1.6
3 children	2
4 children	2.3
5 children	2.5
6 children	2.625
7 children	2.75
8 children	2.813
9 children	2.844
10 children	2.86
